**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

This application is in condition for allowance, except for the presence of claims 16 to 42, which was non-elected without traverse. Accordingly, claims 16-42 have been cancelled.

Figures 1-3 are informal as the labels were handwritten; therefore, new formal drawings are required.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

***Reasons for Allowance***

3. Claims 1-15 are allowable over the prior art.
4. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art does not disclose nor suggest the use of a storage capacitor with a capacitance per area at least two orders of magnitude of the capacitance per area of the photosensor. As a result, claim 1 and dependent claims 2-15 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,801,258 B1 to Pain et al disclose a CMOS sensor.

US 6,532,040 B1 to Kozlowski et al disclose an active pixel sensor.

US 4,631,400 to Tanner et al disclose an optical motion detector.
